

**Description:**

Electrostatic Discharge Certification Program 6.0 runs under Windows 2000, 2003, NT, XP, Vista and Windows 7. The program is customer customizable.

**Features:**

- Trains and tests operator on ESD control practices
- Use to fulfill ANSI/ESD S20.20 section 7.2 training requirement
- Only takes about 1 hour to complete
- Comes with Administrators Module to track personnel and maintain records
- Electrostatic Discharge Certification Program 6.0, runs under Windows 2000, 2003, NT, XP, Vista and Windows 7
- Customer customizable: customer can omit any slide in the training program, and the associated test questions will also be omitted

**Course Content:**

Module 1: What is ESD?

- Generation of ESD
- Concepts and Definitions
- Grounding fundamentals

Module 2: Effects of ESD

- Component structures subject to ESD damage.
- Measurement of ESD damage in electrical equipment
- Economics
- Measurement of ESD susceptibility

Module 3: Control of ESD

- Engineering Role
- Individuals role in handling ESDS material.
- Quality Department role
- Building a typical workstation
- Manufacturing Environment process
- Transporting and Storage process
- Field Service process

Made in the United States of America

**Attention:** Opened media products are returnable only for same item replacement product. No credit will be issued.

The Electrostatic Discharge Certification Program, Version 6.0, presents the electronics workstation operator with educational training in understanding ESD and controlling it's destructive effects.

The ESD Training Program comes with a separate program that needs to be install onto the computer. The Administrator 2012 is located on the CD-ROM under the directory Administrator 2012. The master password is "admin". This program is used to track the student's training records and print certificates. Administrator 2012, for tracking your student's information to include printing exams as the student answered them, printing certificates with the student's name, and can remind the administrator when a student's certification is about to expire.

The Single User version is to be loaded on a single Window s PC, however there is no limit to the number of students that can be trained. The training program is "non-transferable" meaning it must reside on only one PC. Administrator 2012 comes with the training program. The version 6.0 is redesigned from earlier versions was developed using the latest standards for ESD control and now includes the Customer Customizable feature.

The network version is designed to be loaded on a network server and can be run by anyone connected to that server. A small program is executed by the user to load an icon on the person's computer, connecting them to the ESD Training on the server. Their student records are saved in a database on the server that can be accessed using Administrator 2012, which comes with the ESD Certification Program.

The network version and single user version has the same course content.

**Training Plan:**

"Initial and recurrent ESD awareness and prevention training shall be provided to all personnel who handle or otherwise come into contact with any ESDS [ESD sensitive] items. Initial training shall be provided before personnel handle ESDS items. The type and frequency of ESD training for personnel shall be defined in the Training Plan. The Training Plan shall include a requirement for maintaining employee training records and shall document where the records are stored. Training methods and the use of specific techniques are at the Organization's discretion. The training plan shall include the methods used by the Organization to verify trainee comprehension and training adequacy." [ANSI/ESDS20.20 section 7.2]
