

- Desco Europe Dissipative Document Holders are designed to contain and protect documents within ESD Protected Areas. Unprotected documents could hold electrostatic charges that may cause damage to electrostatic sensitive devices.
- The Dissipative Document Holders provide mechanical protection to their contents. They do not stick to documents or lift off ink. Documents are easily inserted into the holders, which have two open sides.
- The surface of the holders is made to accept markings in ink.
- The document holders are static-dissipative and low-charging, which means that electrostatic charges can be removed when grounded and during normal use they are non-tribocharging.
- They are made of polyethylene modified using durAstatic® technology. Document holders do not contain additives that bloom to the surface or that are volatile. The holders are therefore suitable for use in clean rooms.

"All non-essential insulators and items (plastics and paper), such as coffee cups, food wrappers and personal items shall be removed from the workstation or any operation where unprotected ESDS are handled." [EN 61340-5-1 Clause 5.3.4.2 Insulators]

Technical Information

Size	A4
Internal dimensions (H x W)	300mm x 216mm
External dimensions (H x W)	306mm x 219mm
Film thickness	90µm
Weight per 100	1.7kg
Surface resistance @ 22°C / 15% rH (IEC 61340-2-3)	< 1 x 10 ¹¹ ohms
Charge decay time @ 22°C / 15% rH (EIA 541 app. F)	<2s
Colour	Clear, transparent

Item	Description
238775	Dissipative Document Holders, A4, Packs of 100

Made in Italy

Unless otherwise noted, tolerance ±10%
Specifications and procedures subject to change without notice.
