

Statguard® Static Dissipative Modular Carpet Tiles

Description

Statguard® Static Dissipative Modular Carpet Tiles provide a permanent static-free walking surface for almost any mission critical and sensitive electronics handling application. The Statguard® Static Dissipative Modular Carpet Tiles creates a low static generating (antistatic) environment within the preferred static dissipative ohms range (able to provide a path-to-ground to remove electrostatic charges). The random non-directional patterns eliminate the visual effects of tuft trampling and enable easy installation and tile movement without concern for tile orientation. Statguard® Static Dissipative Modular Carpet Tiles are manufactured with Universal premium branded type 6,6 nylon.

Rtt: 1×10^6 to $< 1 \times 10^9$ ohms, per ANSI/ESD S7.1 and ESD TR53 meets the required limits of ANSI/ESD S20.20 for ESD flooring $< 1 \times 10^9$ ohms. Section 6.2.2.2 regarding Personnel Grounding Guidance, states: "ESD protective flooring, used with approved footwear, may be used as an alternative to the wrist strap system for standing operations."

Additionally, Statguard® Static Dissipative Modular Carpet Tiles meets the static dissipative requirements outlined in these mission critical and telecom industry documents: Motorola R56, FAA STD 019e, ATIS 0600-321-2010 and IBM/Burroughs Standard
