

Description:

Our static dissipative paper provides a solution to the needs of companies that require the use of documents in static sensitive environments. The paper is permanently static dissipative. They have low sensitivity to changes in relative humidity, and almost free in component critical contaminants, (i.e. low amine, chloride and sodium). The paper has a hard surface, is printable with no bleeding and virtually lint free. This paper is ideal for use as production route sheets, work instructions, repair tags or antistatic liners. As it is low-linting it can be used in clean areas. All our Static Dissipative Paper is recyclable.

Dissipative White Paper

- Solves problem regular paper places on ESD worksurface by blocking path-to-ground
- Saves time - routing sheets don't need to be re-inserted into sheet protector
- Permanent static dissipative properties with low sensitivity to changes in relative humidity
- Low in component critical contaminants such as amine, chloride and sodium
- Hard surface provides bleed-free printing
- Class 10,000 cleanroom compatible
- Pink indicator strip identifies sheets as static dissipative

Base Weight 80 gms/m²
 Thickness 0.0040" (.1016mm), ±0.0002" (.0050mm)
 Resistance 1 x 10E4 to < 1 x 10E11 ohms per ANSI/ESD STM 11.11

Item	Description
16100	8.5" x 11", White, 500 sheets per pack

Unless otherwise noted, tolerance is ± 10%
Specifications and procedures subject to change without notice.

Made in the
United States of America
