

DESCO INDUSTRIES INC

Static Control Products and Supplies for ESD Protection

Past Training Reviews

ANSI/ESD S20.20-2014 Training

"Thank you to your Desco Industries team for the training. This is one of the most comprehensive training I have been to and it included everything from technical notes to demonstration which is very helpful to actually see it first-hand. I also like that it is categorized into the different areas, allows for easy focus. One of the next steps for my team is to establish an ESD area in our engineering work area, I am looking forward to applying what I have learned to it."

Edmond Ng, Sr Electrical Engineer, Guerbet, Cincinnati, Ohio

"Great class and great material. Our people at Irvine Electronics appreciate the additional education and training that Desco Industries provided. I always think that our people are pretty competent on ESD overall, but the class really provided a nice boost. Good feedback from our crew. Keep up the great work."

Rich Brown, General Manager, Irvine Electronics, Irvine, California

What is ESD and how do you control it to protect your ESD sensitive components?

In order for an ESD control program to be effective, there needs to be a dedicated person/team managing and leading the program. Committed understanding by leadership of the rules of controlling static electricity and how to properly use ESD control items will lead to an effective and sustainable ESD program from management to operator level. Focused training and organization are key components to achieving a successful ESD program.

The Standard for ESD Control

ANSI/ESD S20.20-2014 is the Standard used by companies all over the world for guidance in implementing, verifying, and maintaining high quality ESD Control Programs. Desco Industries is offering a training course that is targeted for ESD professionals who would like to gain an understanding of the basic purpose and details of the ANSI/ESD S20.20-2014 standard. This course will be particularly helpful to those who are new to the implementation and management of an ESD Program of any size or any scope, no matter how deep your involvement is in the ESD Program.

The course series will cover:

- ESD Basics
- S20.20-2014 Review – Administrative, Technical
- ESD Control Items
 - Product Qualification
 - Compliance Verification
- Worksurfaces
- Personnel Grounding
- Flooring
- Grounding
- Seating
- Ionization
- Shelving
- Mobile Equipment
- Packaging
- Continuous Monitoring
- Garments

A certificate recognizing completion of the Desco Industries Inc ANSI/ESD S20.20-2014 Training Course will be issued after full completion of the course and related exams.

Course Schedule:

Tuesday, February 8, 2022 1:00 PM - 3:00 PM EST
Tuesday, February 15, 2022 1:00 PM - 3:00 PM EST
Tuesday, February 22, 2022 1:00 PM - 3:00 PM EST
Tuesday, March 1, 2022 1:00 PM - 3:00 PM EST

ESD Basics/Technical and Administrative Review of S20.20-2014
Grounding/Personnel Grounding/Continuous Monitors/Flooring
Worksurfaces/Mobile Equipment/Shelving/Seating
Packaging/Ionization/Garments/Gloves-Finger Cots

Registration ends Tuesday, February 1st. Contact Desco Industries to Register!
