Description:
The 07501, 07502 and 07503 Premium Sole Grounders provide a more complete path-to-ground than regular heel or toe grounders due to a wider and more consistent contact area. The rubber sole pattern is made from a black conductive outer layer and a non-marring lining that prevents carbon marks on shoes. These units include a blue grounding tab with carbon suffused fibers and hook and loop fastening systems. The Sole Grounders are UL listed. The product has been tested to ESD STM 97.2 - Floor Materials and Footwear Voltage Measurement in Combination with a Person. It is a suitable ESD footwear component in Flooring - Footwear System when used as the primary grounding method (<3.5 x 10E7 ohms per ESD STM 97.1 Floor Materials and Footwear-Resistance Measurement in Combination with a Person.)

Components:
A. 0.080" thick, 1.50" wide, dual layer rubber, black conductive exterior with a non-marring interior. Tear resistant nylon reinforced 4.3 oz. inner scrim layer prevents the rubber from tearing.
B. 3/8" wide, 30" long blue polyester tab contains electrically conductive carbon suffused fibers.
C. 3/4" wide, blue loop material with return hook tip for quick and easy adjustment and wearer's comfort.
D. 3/4" wide blue elastic material stretches for comfort.
E. Hook and loop fastening system.
F. A 1/4 watt, 2 megohm resistor.
G. Stretch elastic back.

Tab to cup resistance:
10E6 Ohms @ 100 volts

Notes: Operator is grounded when foot is in contact with grounded dissipative or conductive flooring. Desco recommends the use of the Desco EMIT Smart Log®, item 50440.

For additional information on the use and maintenance of foot grounders please ask for Technical Bulletins TB-2020 and TB-2040.
