DUAL LAYER RUBBER MATTING

Specifications

Standard Document
ANSI/ESD S20.20

Meets Requirements of:
Worksurface

Physical Properties

Construction: Dual-layer rubber material

Thickness: 0.060”

Colors: Light Blue, Grey, Dark Blue

Tolerances

Width ± .250”

Length ± .250” every 1 linear foot of running material.

Thickness ± .005”

Use With Continuous Monitor

This material may be used with ESD workstation continuous monitors.

Grounding & Cleaning

If the material is used on top of an already properly grounded surface, grounding hardware may not be necessary. Where no properly grounded surface is available, grounding hardware is required to provide a path-to-ground. Rtg compliance verification measurements must be made as outlined in ESD TR53 with a surface resistance meter.

See Tech Bulletin TB-7000 for Reztore® Surface & Mat Cleaner Application Instructions.

Limited Warranty:

Desco warrants for one year that Dual Layer Rubber matting products will be free of defects in materials and workmanship. Damage to matting caused by misuse of any kind, including using inappropriate cleaners is not covered by Desco Limited Warranty.
