Description
Desco’s clear Dissipative Cart Covers are made from a dissipative (1 x 10^9 to < 1 x 10^{11} ohms per ANSI/ESD STM11.11) and low charging 0.012 inch polyvinylchloride (PVC) material. They are designed to be used with ESD susceptible items and allow contents of the carts to be identified without opening the cover. The covers include zippered front flaps that may be left open for access to the cart when the flap is opened. The flap can be locked (lock not included) closed to prevent tampering with cart contents when not in use. A dissipative document pocket is located on the outside of the cart to store documents.

Electrical Properties
Surface Resistance
1 x 10^9 to < 1 x 10^{11} ohms per ANSI/ESD STM11.11

Physical Properties
Color Clear*
Emboss Pattern Non-Embossed
Gauge 0.012" ± 0.002" (~1/80", 12 mils)
Tensile 1000lb/in^2 minimum ASTM D412, Die C
Elongation 150% minimum ASTM D412, Die C
Tear 125 lb/in minimum ASTM D624, Die C

Chemical Resistance
Resistant to degradation by inorganic acids, organic acids, reducing agents, detergent solutions, alcohols, aliphatic hydrocarbons, mineral oil, amines, and aldehydes.
