

DESCO INDUSTRIES INC

Static Control Products and Supplies for ESD Protection

ANSI/ESD S20.20-2021 Training

Past Training Reviews

"Thank you to your Desco Industries team for the training. This is one of the most comprehensive training I have been to and it included everything from technical notes to demonstration which is very helpful to actually see it first-hand. I also like that it is categorized into the different areas, allows for easy focus. One of the next steps for my team is to establish an ESD area in our engineering work area, I am looking forward to applying what I have learned to it."

Edmond Ng, Sr Electrical Engineer, Guerbet, Cincinnati, Ohio

"Desco and SCS are what any organization would desire as their partner in ESD training and static control products. Their latest ANSI & ESD S20.20-2021 training and certification programs are well thought out and professionally presented with sections on the theoretical and practical aspects of the standards, and demonstrations of the equipment needed every day for effective ESD control. This training covers all necessary topics needed to help your business build a comprehensive ESD control program, certify your staff, and support your specific needs with an impressive lineup of equipment to help minimize the risk of ESD damage to your products in your workplace. Many thanks from our team to yours, keep up the great work!"

S R Cooper, Man of Many Hats including ESD Coordinator, MicroSat Systems Canada Inc

What is ESD and how do you control it to protect your ESD sensitive components?

In order for an ESD control program to be effective, there needs to be a dedicated person/team managing and leading the program. Committed understanding by leadership of the rules of controlling static electricity and how to properly use ESD control items will lead to an effective and sustainable ESD program from management to operator level. Focused training and organization are key components to achieving a successful ESD program.

The Standard for ESD Control

ANSI/ESD S20.20-2021 is the Standard used by companies all over the world for guidance in implementing, verifying, and maintaining high quality ESD Control Programs. Desco Industries is offering a training course that is targeted for ESD professionals who would like to gain an understanding of the basic purpose and details of the ANSI/ESD S20.20-2021 standard. This course will be particularly helpful to those who are new to the implementation and management of an ESD Program of any size or any scope, no matter how deep your involvement is in the ESD Program.

The course series will cover:

- ESD Basics
- S20.20-2021 Review – Administrative, Technical
- ESD Control Items
 - Product Qualification
 - Compliance Verification
- Worksurfaces
- Personnel Grounding
- Flooring
- Grounding
- Seating
- Ionization
- Shelving
- Mobile Equipment
- Packaging
- Continuous Monitoring
- Garments

A certificate recognizing completion of the Desco Industries Inc ANSI/ESD S20.20-2021 Training Course will be issued after full completion of the course and related exams.

Course Schedule:

Tuesday, February 6, 2024	1:00 PM - 3:00 PM EST	ESD Basics/Technical and Administrative Review of S20.20-2021
Tuesday, February 13, 2024	1:00 PM - 3:00 PM EST	Grounding/Personnel Grounding-Wrist Straps/Continuous Monitoring/Flooring-Personnel Grounding
Tuesday, February 20, 2024	1:00 PM - 3:00 PM EST	Worksurfaces/Mobile Equipment/Shelving/Seating
Tuesday, February 27, 2024	1:00 PM - 3:00 PM EST	Packaging/Ionization//Garments/Gloves/Finger Cots

Registration ends Tuesday, January 30th. Contact Desco Industries to Register!
