Product Specifications for S1051 Series Dual Grounding Block for Workbenches

Description

The S1051 is a space-saving grounding block designed to provide direct path to ground in ESD Benches & Workstations for up to 2 operators/users. Meets MIL-PRF-8789B.

Features

- Can easily be installed/mounted at the desired location, ideally beneath, work benches, through two mounting holes.
- A 6' long Coil Cord with a # 10 Ring Terminal provides an easy connecting point to the ground.
- With its no built-in resistor construction, this product provides a direct path to the ground.
