Description:
Featuring an anti-fatigue, ergonomic air cell molded structure, this design offers cushioning and insulation to reduce fatigue in standing personnel. The interlocking feature allows the design of custom lengths and the conductive rubber insures rapid charge drainage. Beveled edges provide a gentle rise for safety and a finished appearance. When interlocked, the sections of material maintain conductivity automatically. This rubber mat resists damage from heat, abrasion, and common solvents. In lengthy applications, the use of ground connection for every 5 mat sections is recommended.

RoHS Compliance Statement
None of the following materials are intentionally added in manufacturing this product: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) as outlined in the Directive 2002/95/EC Article 4.1. See Desco Industries Inc. letter on-line at Desco.com.

Limited Lifetime Warranty
Desco warrants for one year that Statfree® matting products will be free of defects in materials and workmanship and will guarantee dissipative/conductive mat properties for the life of the mat. Damage to matting caused by misuse of any kind, including using inappropriate cleaners is not covered by Desco Limited Warranty.
Electrical Properties:

Specifications:

- Construction: Molded homogeneous conductive rubber
- Thickness: 0.50" Nominal (12.7mm)
- Section Size: 28" x 36" nominal
- Surface: Light texture embossing
- Weight: 10 lbs. per section
- Hardness: 65 Shore A
- Color: Black
- Cleaning: For optimum electrical performance, surfaces must be cleaned regularly with a mild detergent and water solution. We suggest using ReztoRe™ Surface & Mat Cleaner Item #10435 or Static-Wipes Item #10600. Do not use cleaners with silicone. Silicone build-up will create an insulative film on the surface.

Per section 3 Definitions of Floor standard ESD STM7.1-2001 "Conductive Flooring Material: A floor material that has a resistance to ground of less than 10E6 ohms."
