The hook-and-loop type fastener also allows fast mounting to smooth surfaces. This method is convenient for mounting the tester on a workstation leg or on an upright support for shelving or lights. (Note - the snap does not have to be connected for proper grounding).

Equipment Rating:
AC Adapter rated 120 Vac, 60 Hz, 6 W.
Ground Touch Tester rated 6.5 Vdc, 50 mA.

Environmental Conditions
- Suitable for indoor use only at altitudes not exceeding 6500 ft. (2Km)
- Temperature range of 41°F (5°C) to 104°F (40°C)
- Maximum relative humidity of 80% up to 88°F (31°C) decreasing linearly to 50% @ 104°F (40°C)
- Pollution degree 2 per IEC 664
- Installation Category II

CAUTION: If this equipment is used in a manner not specified by the manufacturer, the protection provide by the equipment may be impaired.
Operation
When the Touch Tester’s power supply is plugged into a grounded outlet the red LED will be on, indicating that the unit is powered. The utility ground is internally connected to the .395” (10mm) snap stud on the back of the unit and to the 2 banana jacks at the bottom edge of the tester.

Audible Option
If desired, the Touch Tester will augment the visual “test good” indicator with an audible signal. In the “on” position, the tester will beep when the green “test good” LED is on, thereby allowing the operator to frequently test the wristband and cord without having to look at the tester.

To enable/disable the signal, a slide switch is accessible through the hole on the back of the unit. First, unplug the power supply. Actuate the switch with a small probing tool, being careful to avoid internal damage.

Calibration
We recommend annual calibration of our testers. The model 19350 is calibrated to NIST traceable standards. Calibration may be performed to ensure that the tester is operating within limits.

Desco offers a calibration unit that is specifically designed to simplify the calibration procedure. This unit is sold as item 07010. The 07010 comes calibrated to NIST traceable standards. Ask for Technical Bulletin TB-2039 for detailed procedure to calibrate the 19350.

Specifications
- Operating Voltage: 6 VDC
- Operating Temperature: 32°F to 104°F (0 to 40°C)
- Wrist Strap Test Limit: 750 kilohms to 10 megohms
- Test Accuracy: ±20%
- Test Voltage: 4 VDC
- Dimensions: 2.9” x 2.1” x 0.8”
- Weight: 0.1 lbs
